

Single Tier Cable Basket, 953mm

The Single Tier Cable Basket is useful for anyone wanting to neatly manage a regular quantity of cables under the desktop.

The single tier cable basket can be used to run insulated cables (such as computer and electrical cables) under the desktop, to keep your work area tidy, organised and, most importantly, safe.

The tray is large enough to house everything you need to operate a typical workstation, and can even accommodate larger items such as inline power adapters if required.

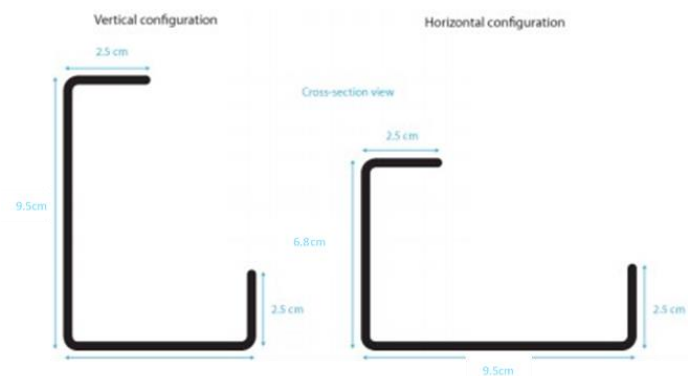

A sturdy and effective cable management system that can be mounted to the underside of your desk for a neat workstation.
